

JOIA DE BAUME & MERCIER

A NEW TWO-TONE INTERPRETATION

Baume & Mercier introduces a new two-tone version of Joia de Baume & Mercier, combining stainless steel and 4N gold-tone PVD coating. A new interpretation that brings an additional touch of contrast to the collection's distinctive bijou-inspired design.

A NEW TWO-TONE DESIGN

The new Joia de Baume & Mercier M0A10896 retains the delicate 28 mm lug-free round case that defines the collection, here crafted in polished stainless steel with a 4N gold-tone PVD coating bezel. Its silver sunray motif dial is complemented by 4N gilded Roman numerals and leaf hands.

For the first time, the integrated three-row H-shaped bracelet combines polished and satin-finished stainless steel with 4N gold-tone PVD coating central links. The two-tone design gives Joia a new character while preserving what defines the collection: refined proportions, an effortless elegance and the spirit of a jewel that tells the time.

JOIA DE BAUME & MERCIER M0A10896

- **Movement**
 - Quartz (Ronda 751)
